Reman versus new build cartridges

- New-build cartridges have a high risk of patent infringement. They are often supplied as being remanufactured products or even as OEM products.
- If you sell patent infringing new-build cartridges you will be liable for OEM patent infringement.
- XPS remanufactured products are not patent infringing because they are protected by XPS processes and the Doctrine of Exhaustion.
- XPS only builds 100% remanufactured cartridges.
- Zero waste solution: all components recycled or disposed safely:
NOTHING GOES TO LANDFILL!
